I. Major Options - What options are offered within the major? How do they differ?

Exercise Science Major- educates students in the life sciences for careers in a variety of areas including medicine, physical and occupational therapy, athletic training, and exercise physiology.

Sports Management Major- prepares our students for careers in the world of sports business including marketers, athletic directors, and facility managers.

II. Total number of students within the major

Combined over 1000- exact number not provided.

III. Goals within the major - What are expectations of students post-graduation?

IV. Major Courses - What is the goal of each course? What should students be learning?

The Exercise Science Major provides students with a strong science foundation emphasizing preparation for further specialized graduate study or direct entrance into a variety of fields related to exercise physiology, biomechanics, sport medicine and direct entrance to upper level certifications in the rehabilitation and fitness industries.

The Sport Management Major is designed to meet the growing interest in the business, administration, marketing, and management of sport programs and facilities. Graduates may choose to pursue advanced degrees in such topics as administration, marketing, MBAs, law school, and facility management.
